## Informe de la página web Lugares turísticos de la provincia de Pichincha

Ante el presente proyecto se ha desarrollado una página web principal llamada index en la cual se da a conocer características de la provincia de Pichincha, por otro lado se ha creado 5 páginas adicionales que serán parte del menú de navegación de nuestra página principal cada una de ellas tiene un enfoque único y relacionado al tema por el cual se desarrolló la presente página, desde mi experiencia puedo decir que ha sido bastante enriquecedor el poder empezar con este proyecto he podido realizar la practica y el uso de las diferentes etiquetas de HTML aprendidas durante estas semanas de clases y evidenciar el correcto uso de cada una de ellas, en cuanto al entorno utilizado llamado visual code studio me ha parecido un entorno bastante interactivo y super útil para el desarrollo de la página me ha facilitado de gran manera al momento de escribir el código durante el proceso de desarrollo, a continuación se adjunta imágenes en las cuales se puede evidenciar que se ha hecho uso de un validador llamado servicio de validación de marcado y que el código esta correcto.

### Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for uploaded file index.html

Checker Input

Show ☐ source ☐ outline ☐ image report [Options...](#)

Check by [file upload](#) [Seleccionar archivo](#) Ninguno archivo selec.

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

[Check](#)

Document checking completed. No errors or warnings to show.

Used the HTML parser.

Total execution time 19 milliseconds.
